Green Walls

Some spaces are not complete without vertical greenery. Not sure about how to choose a system and the proper plant species? Let us help! We have been studying, touring and networking with growers, other designers and peers across North America to bring you options and styles for your space and taste. We currently feature three distinct systems to choose from. We will design, install and maintain the system and plants for you. Let us take your plantings to new heights, without taking valuable floor space. Let plants be the statement art piece in your unique space!

Some systems require 4" diameter plants, some 6" diameter. Our designers will help you choose the system, design, and plant palate for your statement piece and your budget. We will meet with you over your building designs, or in your current space to talk about logistics, time frames, cost and weight per square foot, lighting requirement, and any special equipment needed for installation and/or plant care.

Aglaonema
'Maria'

Aglaonema 'Snow
White'

Aglaonema
'Sapphire Suzanne'

Chlorophytum
Spider Plant

Dracaena Janet
Craig Compacta

Dracaena
Warneckii Jumbo

Dracaena Warneckii
'Lemon Lime'

Pothos
'Marble Queen'

Pothos 'Neon'

Variegated
Schefflera

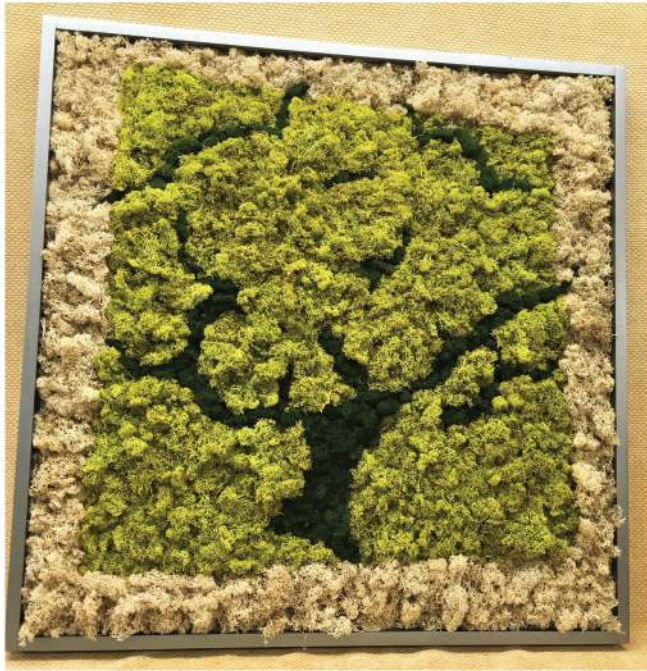

Staghorn
Fern

Moss Walls

Is access or environment a concern? Sometimes a custom moss wall is the right choice. Reindeer moss is a preserved natural material, now available in over a dozen colors, including 4 shades of green.
